

MASTERING GRADE 4 MULTIPLICATION

COMPREHENSIVE EXERCISE ANSWER KEY

This reference document provides complete, verified, and step-by-step solutions to all the exercises, worksheets, and enrichment activities found in **Chapter 4: Multiplication** of the Grade 4 Mathematics curriculum. Designed to support parents, teachers, and students in verifying and understanding mathematical concepts.

Chapter 4 Tune Up (Page 48)

Topic: Chessboard Exploration

• **Question:** Count the number of square boxes in the chessboard. There are ____ boxes.

Answer: There are **64** boxes.

• **Question:** How many boxes are there in the first row? ____

Answer: There are **8** boxes.

• **Question:** How many boxes are there in the first column? ____

Answer: There are **8** boxes.

• **Question:** Number of boxes in first row $\times$ Number of boxes in first column = ____ $\times$ ____ = ____

Answer: **$8 \times 8 = 64$**

• **Question:** Is it equal to the number of boxes which you have counted earlier?

Answer: **Yes**, counting individually or multiplying both result in exactly 64 boxes.

Exercise 4A (Page 51)

1. Find the product of the following (with carrying):

Question	Calculations & Steps	Final Answer
a) 573×4	$\begin{array}{r} 573 \\ \times 4 \\ \hline \end{array}$ $3 \times 4 = 12$ (Write 2, carry 1) $7 \times 4 = 28 + 1 = 29$ (Write 9, carry 2) $5 \times 4 = 20 + 2 = 22$	2,292

Question	Calculations & Steps	Final Answer
b) $4,375 \times 7$	$\begin{array}{r} 4\ 3\ 7\ 5 \\ \times 7 \\ \hline \end{array}$ $5 \times 7 = 35$ (Write 5, carry 3) $7 \times 7 = 49 + 3 = 52$ (Write 2, carry 5) $3 \times 7 = 21 + 5 = 26$ (Write 6, carry 2) $4 \times 7 = 28 + 2 = 30$	30,625
c) $6,890 \times 6$	$\begin{array}{r} 6\ 8\ 9\ 0 \\ \times 6 \\ \hline \end{array}$ $0 \times 6 = 0$ $9 \times 6 = 54$ (Write 4, carry 5) $8 \times 6 = 48 + 5 = 53$ (Write 3, carry 5) $6 \times 6 = 36 + 5 = 41$	41,340
d) $3,851 \times 5$	$\begin{array}{r} 3\ 8\ 5\ 1 \\ \times 5 \\ \hline \end{array}$ $1 \times 5 = 5$ $5 \times 5 = 25$ (Write 5, carry 2) $8 \times 5 = 40 + 2 = 42$ (Write 2, carry 4) $3 \times 5 = 15 + 4 = 19$	19,255

2. Multiply the following (Standard Long Multiplication):

Question	Calculations / Intermediate Steps	Final Product
a) 716×245	$716 \times 5 = 3,580$ $716 \times 40 = 28,640$ $716 \times 200 = 143,200$ Sum: $3,580 + 28,640 + 143,200$	175,420
b) 729×638	$729 \times 8 = 5,832$ $729 \times 30 = 21,870$ $729 \times 600 = 437,400$ Sum: $5,832 + 21,870 + 437,400$	465,102
c) 386×77	$386 \times 7 = 2,702$ $386 \times 70 = 27,020$ Sum: $2,702 + 27,020$	29,722
d) 907×581	$907 \times 1 = 907$ $907 \times 80 = 72,560$ $907 \times 500 = 453,500$ Sum: $907 + 72,560 + 453,500$	526,967
e) $2,124 \times 32$	$2,124 \times 2 = 4,248$ $2,124 \times 30 = 63,720$ Sum: $4,248 + 63,720$	67,968
f) $3,047 \times 93$	$3,047 \times 3 = 9,141$ $3,047 \times 90 = 274,230$ Sum: $9,141 + 274,230$	283,371

Question	Calculations / Intermediate Steps	Final Product
g) $6,514 \times 16$	$6,514 \times 6 = 39,084$ $6,514 \times 10 = 65,140$ Sum: $39,084 + 65,140$	104,224
h) $7,844 \times 35$	$7,844 \times 5 = 39,220$ $7,844 \times 30 = 235,320$ Sum: $39,220 + 235,320$	274,540
i) $1,284 \times 746$	$1,284 \times 6 = 7,704$ $1,284 \times 40 = 51,360$ $1,284 \times 700 = 898,800$ Sum: $7,704 + 51,360 + 898,800$	957,864
j) $6,704 \times 117$	$6,704 \times 7 = 46,928$ $6,704 \times 10 = 67,040$ $6,704 \times 100 = 670,400$ Sum: $46,928 + 67,040 + 670,400$	784,368
k) $4,875 \times 118$	$4,875 \times 8 = 39,000$ $4,875 \times 10 = 48,750$ $4,875 \times 100 = 487,500$ Sum: $39,000 + 48,750 + 487,500$	575,250
l) $2,564 \times 337$	$2,564 \times 7 = 17,948$ $2,564 \times 30 = 76,920$ $2,564 \times 300 = 769,200$ Sum: $17,948 + 76,920 + 769,200$	864,068

Exercise 4B (Page 52)

1. Use the properties of multiplication to fill in the blanks:

The solutions utilize four fundamental properties: *Order (Commutative) Property*, *Grouping (Associative) Property*, *Multiplication by 1 (Identity)*, and *Multiplication by 0*.

Question with Blank	Filled Answer	Property Applied
a) $654 \times 1 = \underline{\hspace{2cm}}$	$654 \times 1 = \mathbf{654}$	Multiplication by 1 (Identity Property)
b) $\underline{\hspace{2cm}} \times 1 = 3,455$	$\mathbf{3,455} \times 1 = 3,455$	Multiplication by 1 (Identity Property)
c) $8,546 \times 0 = \underline{\hspace{2cm}}$	$8,546 \times 0 = \mathbf{0}$	Multiplication by 0 (Zero Property)
d) $8,689 \times \underline{\hspace{2cm}} = 0$	$8,689 \times \mathbf{0} = 0$	Multiplication by 0 (Zero Property)
e) $679 \times 35 = 35 \times \underline{\hspace{2cm}}$	$679 \times 35 = 35 \times \mathbf{679}$	Order Property (Commutative: $a \times b = b \times a$)
f) $695 \times \underline{\hspace{2cm}} = 600 \times 695$	$695 \times \mathbf{600} = 600 \times 695$	Order Property (Commutative: $a \times b = b \times a$)
g) $458 \times (165 \times 34) = (458 \times 34) \times \underline{\hspace{2cm}}$	$458 \times (165 \times 34) = (458 \times 34) \times \mathbf{165}$	Grouping Property (Associative: $a \times (b \times c) = (a \times c) \times b$)
h) $996 \times (430 \times \underline{\hspace{2cm}}) = (996 \times 430) \times 712$	$996 \times (430 \times \mathbf{712}) = (996 \times 430) \times 712$	Grouping Property (Associative)

Exercise 4C (Page 53)

1. Multiply the following using the expanded form:

Question	Expanded Form Steps	Final Answer
a) 217×4	$(200 + 10 + 7) \times 4 = (200 \times 4) + (10 \times 4) + (7 \times 4)$ $= 800 + 40 + 28$	868
b) 436×6	$(400 + 30 + 6) \times 6 = (400 \times 6) + (30 \times 6) + (6 \times 6)$ $= 2400 + 180 + 36$	2,616
c) 712×5	$(700 + 10 + 2) \times 5 = (700 \times 5) + (10 \times 5) + (2 \times 5)$ $= 3500 + 50 + 10$	3,560
d) $3,175 \times 4$	$(3000 + 100 + 70 + 5) \times 4 = (3000 \times 4) + (100 \times 4) + (70 \times 4) + (5 \times 4)$ $= 12000 + 400 + 280 + 20$	12,700
e) $2,058 \times 6$	$(2000 + 50 + 8) \times 6 = (2000 \times 6) + (50 \times 6) + (8 \times 6)$ $= 12000 + 300 + 48$	12,348
f) $1,058 \times 8$	$(1000 + 50 + 8) \times 8 = (1000 \times 8) + (50 \times 8) + (8 \times 8)$ $= 8000 + 400 + 64$	8,464
g) $4,575 \times 2$	$(4000 + 500 + 70 + 5) \times 2 = (4000 \times 2) + (500 \times 2) + (70 \times 2) + (5 \times 2)$ $= 8000 + 1000 + 140 + 10$	9,150
h) $7,309 \times 3$	$(7000 + 300 + 9) \times 3 = (7000 \times 3) + (300 \times 3) + (9 \times 3)$ $= 21000 + 900 + 27$	21,927
i) $6,159 \times 5$	$(6000 + 100 + 50 + 9) \times 5 = (6000 \times 5) + (100 \times 5) + (50 \times 5) + (9 \times 5)$ $= 30000 + 500 + 250 + 45$	30,795
j) $9,532 \times 7$	$(9000 + 500 + 30 + 2) \times 7 = (9000 \times 7) + (500 \times 7) + (30 \times 7) + (2 \times 7)$ $= 63000 + 3500 + 210 + 14$	66,724
k) $5,319 \times 9$	$(5000 + 300 + 10 + 9) \times 9 = (5000 \times 9) + (300 \times 9) + (10 \times 9) + (9 \times 9)$ $= 45000 + 2700 + 90 + 81$	47,871
l) $8,045 \times 6$	$(8000 + 40 + 5) \times 6 = (8000 \times 6) + (40 \times 6) + (5 \times 6)$ $= 48000 + 240 + 30$	48,270

2. Fill in the blanks (Multiplying by Multiples of 10, 100, 1000):

Rule: Multiply the non-zero digits and append the corresponding number of trailing zeros.

Question	Calculations	Final Filled Blank
a) $7,234 \times 400$	$7,234 \times 4 = 28,936$. Append two zeros.	$7,234 \times 400 = 2,893,600$
b) $621 \times 2,000$	$621 \times 2 = 1,242$. Append three zeros.	$621 \times 2,000 = 1,242,000$
c) 91×20	$91 \times 2 = 182$. Append one zero.	$91 \times 20 = 1,820$
d) 141×300	$141 \times 3 = 423$. Append two zeros.	$141 \times 300 = 42,300$
e) $23 \times 2,000$	$23 \times 2 = 46$. Append three zeros.	$23 \times 2,000 = 46,000$
f) $1,723 \times 5,000$	$1,723 \times 5 = 8,615$. Append three zeros.	$1,723 \times 5,000 = 8,615,000$

Question	Calculations	Final Filled Blank
g) $2,512 \times 60$	$2,512 \times 6 = 15,072$. Append one zero.	$2,512 \times 60 = 150,720$
h) $1,312 \times 4,000$	$1,312 \times 4 = 5,248$. Append three zeros.	$1,312 \times 4,000 = 5,248,000$
i) $1,900 \times 700$	$19 \times 7 = 133$. Append four zeros.	$1,900 \times 700 = 1,330,000$
j) $1,050 \times 900$	$105 \times 9 = 945$. Append three zeros.	$1,050 \times 900 = 945,000$
k) $809 \times 4,000$	$809 \times 4 = 3,236$. Append three zeros.	$809 \times 4,000 = 3,236,000$
l) $1,201 \times 5,000$	$1,201 \times 5 = 6,005$. Append three zeros.	$1,201 \times 5,000 = 6,005,000$

Exercise 4D (Page 55)

1. Solve the following using Lattice Method:

The Lattice Method involves creating a grid where numbers are multiplied diagonally. The results are summed along diagonal lanes to find the final product. Complete solutions are listed below:

Question	Lattice Structure Setup	Final Product
a) 421×15	Grid: 3 columns (4, 2, 1) by 2 rows (1, 5) Diagonals sum to: Thousands=4, Hundreds=22, Tens=11, Ones=5 -> Adjust carryovers.	6,315
b) 17×18	Grid: 2 columns (1, 7) by 2 rows (1, 8) Summing diagonals yields: Hundreds=1, Tens=19, Ones=56 -> Sum = 306.	306
c) 602×21	Grid: 3 columns (6, 0, 2) by 2 rows (2, 1) Summing diagonals yields: Ten-Thousands=1, Thousands=2, Hundreds=6, Tens=4, Ones=2.	12,642
d) 157×29	Grid: 3 columns (1, 5, 7) by 2 rows (2, 9) Summing diagonals yields: Thousands=2, Hundreds=23, Tens=53, Ones=63 -> Sum = 4,553.	4,553
e) 79×53	Grid: 2 columns (7, 9) by 2 rows (5, 3) Summing diagonals yields: Thousands=3, Hundreds=10, Tens=17, Ones=27 -> Sum = 4,187.	4,187

2. Solve the following using Lattice Method and verify using Standard Method:

Question	Lattice Solution & Verification Step	Verified Answer
a) 103×19	Lattice diagonal sums yield 1,957. Verification: $103 \times 19 = 103 \times (20 - 1) = 2,060 - 103 = 1,957$. (Matches)	1,957
b) 45×43	Lattice diagonal sums yield 1,935. Verification: $45 \times 40 = 1,800$; $45 \times 3 = 135$. Sum = $1,800 + 135 = 1,935$. (Matches)	1,935
c) 87×32	Lattice diagonal sums yield 2,784. Verification: $87 \times 30 = 2,610$; $87 \times 2 = 174$. Sum = $2,610 + 174 = 2,784$. (Matches)	2,784
d) 450×12	Lattice diagonal sums yield 5,400. Verification: $450 \times 10 = 4,500$; $450 \times 2 = 900$. Sum = $4,500 + 900 = 5,400$. (Matches)	5,400
e) 293×15	Lattice diagonal sums yield 4,395. Verification: $293 \times 10 = 2,930$; $293 \times 5 = 1,465$. Sum = $2,930 + 1,465 = 4,395$. (Matches)	4,395

Exercise 4E (Pages 55 & 56)

Real-Life Word Problems (Application-focused):

No.	Word Problem Description & Method	Step-by-Step Calculation	Final Answer
1	A container holds 1,350 kg of food. How many kg do 375 containers hold?	- Food per container = 1,350 kg - Containers = 375 - Calculation: $1,350 \times 375$	506,250 kg
2	Calculate hours in 365 days. Also, calculate hours in 100 such years.	- Hours in 1 day = 24 365 days = $365 \times 24 = 8,760$ hours 100 years = $8,760 \times 100$	8,760 hours (in 1 yr) 876,000 hours (in 100 yrs)
3	One textbook costs Rs 289. What is the cost of 2,550 copies?	- Price per textbook = Rs 289 - Copies = 2,550 - Calculation: $2,550 \times 289$	Rs 736,950
4	A multiplex movie ticket costs Rs 280. What is the cost of 1,250 tickets?	- Ticket price = Rs 280 - Quantity = 1,250 - Calculation: $1,250 \times 280$	Rs 350,000
5	Asha runs 1,750 metres every morning. How far does she run in 180 days?	- Distance per day = 1,750 m - Days = 180 - Calculation: $1,750 \times 180$	315,000 m (or 315 km)
6	One sports uniform costs Rs 545. What is the cost of 1,678 uniforms?	- Price per uniform = Rs 545 - Uniforms = 1,678 - Calculation: $1,678 \times 545$	Rs 914,510
7	A drum takes 32 mugs to fill. How many mugs fill 56 such drums?	- Mugs per drum = 32 - Drums = 56 - Calculation: 56×32	1,792 mugs
8	A cycling track is 4,739 m. How far is 38 laps?	- Lap length = 4,739 m - Laps = 38 - Calculation: $4,739 \times 38$	180,082 m (or 180.082 km)

Exercise 4F (Page 57)

1. Estimate the product of the following:

Method: Round the 3-digit/4-digit numbers to the nearest Hundred or Thousand, and the 2-digit numbers to the nearest Ten before multiplying.

Question	Rounding Strategy	Estimated Calculation	Estimated Product	Actual Product
a) 167×54	167 → 200 (nearest 100) 54 → 50 (nearest 10)	200×50	10,000	9,018
b) 345×87	345 → 300 (nearest 100) 87 → 90 (nearest 10)	300×90	27,000	30,015
c) 453×765	453 → 500 (nearest 100) 765 → 800 (nearest 100)	500×800	400,000	346,545

Question	Rounding Strategy	Estimated Calculation	Estimated Product	Actual Product
d) 432×460	432 $\rightarrow$ 400 (nearest 100) 460 $\rightarrow$ 500 (nearest 100)	400×500	200,000	198,720
e) 877×985	877 $\rightarrow$ 900 (nearest 100) 985 $\rightarrow$ 1,000 (nearest 100)	$900 \times 1,000$	900,000	863,845
f) 544×707	544 $\rightarrow$ 500 (nearest 100) 707 $\rightarrow$ 700 (nearest 100)	500×700	350,000	384,608
g) 456×874	456 $\rightarrow$ 500 (nearest 100) 874 $\rightarrow$ 900 (nearest 100)	500×900	450,000	398,544
h) 664×345	664 $\rightarrow$ 700 (nearest 100) 345 $\rightarrow$ 300 (nearest 100)	700×300	210,000	229,080
i) 346×450	346 $\rightarrow$ 300 (nearest 100) 450 $\rightarrow$ 500 (nearest 100)	300×500	150,000	155,700
j) $1,211 \times 764$	1,211 $\rightarrow$ 1,000 (nearest 1000) 764 $\rightarrow$ 800 (nearest 100)	$1,000 \times 800$	800,000	925,204

2. Word Problem: A wholesale dealer purchased 98 refrigerators. Estimate the amount of money invested if each refrigerator was Rs 15,999.

- **Rounding:** Number of refrigerators: 98 $\rightarrow$ 100 (nearest ten). Price of refrigerator: Rs 15,999 $\rightarrow$ Rs 16,000 (nearest thousand).
- **Estimated Calculation:** $100 \times \text{Rs } 16,000 = \text{Rs } 1,600,000$.
- **Answer:** The estimated investment is **Rs 1,600,000**. (Actual investment is Rs 1,567,902).

3. Word Problem: A shelf in a bookstore can contain 784 books. Estimate the total number of books that can be placed in 198 similar shelves.

- **Rounding:** Books per shelf: 784 $\rightarrow$ 800 (nearest hundred). Number of shelves: 198 $\rightarrow$ 200 (nearest hundred).
- **Estimated Calculation:** $800 \times 200 = 160,000$ books.
- **Answer:** The estimated total number of books is **160,000 books**. (Actual total is 155,232 books).

Chapter Workout (Pages 57 & 58)

1. Find the product of the following:

Question	Calculations	Final Product
a) $7,564 \times 5$	$7,564 \times 5 = 37,820$	37,820
b) $3,422 \times 67$	$3,422 \times 7 = 23,954$; $3,422 \times 60 = 205,320$. Sum = $23,954 + 205,320$	229,274
c) $5,864 \times 12$	$5,864 \times 2 = 11,728$; $5,864 \times 10 = 58,640$. Sum = $11,728 + 58,640$	70,368
d) $8,345 \times 9$	$8,345 \times 9 = 75,105$	75,105
e) $3,246 \times 229$	$3,246 \times 9 = 29,214$; $3,246 \times 20 = 64,920$; $3,246 \times 200 = 649,200$. Sum = $743,334$	743,334
f) $3,596 \times 172$	$3,596 \times 2 = 7,192$; $3,596 \times 70 = 251,720$; $3,596 \times 100 = 359,600$. Sum = $618,512$	618,512
g) $4,586 \times 53$	$4,586 \times 3 = 13,758$; $4,586 \times 50 = 229,300$. Sum = $13,758 + 229,300$	243,058
h) $1,586 \times 556$	$1,586 \times 6 = 9,516$; $1,586 \times 50 = 79,300$; $1,586 \times 500 = 793,000$. Sum = $881,816$	881,816

2. Multiply the following by using the expanded form:

Question	Expanded Form Representation & Steps	Final Product
a) $3,157 \times 4$	$(3,000 + 100 + 50 + 7) \times 4 = 12,000 + 400 + 200 + 28$	12,628
b) 656×9	$(600 + 50 + 6) \times 9 = 5,400 + 450 + 54$	5,904
c) $2,433 \times 3$	$(2,000 + 400 + 30 + 3) \times 3 = 6,000 + 1,200 + 90 + 9$	7,299
d) $4,569 \times 8$	$(4,000 + 500 + 60 + 9) \times 8 = 32,000 + 4,000 + 480 + 72$	36,552
e) $7,890 \times 5$	$(7,000 + 800 + 90) \times 5 = 35,000 + 4,000 + 450$	39,450
f) $8,759 \times 7$	$(8,000 + 700 + 50 + 9) \times 7 = 56,000 + 4,900 + 350 + 63$	61,313

3. Fill in the blanks:

Question	Rule Applied	Filled Equation
a) $7 \times 20 = \underline{\hspace{2cm}}$	$7 \times 2 = 14$, append 1 zero.	$7 \times 20 = 140$
b) $458 \times 100 = \underline{\hspace{2cm}}$	Append 2 zeros.	$458 \times 100 = 45,800$
c) $234 \times 4,000 = \underline{\hspace{2cm}}$	$234 \times 4 = 936$, append 3 zeros.	$234 \times 4,000 = 936,000$
d) $8,754 \times 900 = \underline{\hspace{2cm}}$	$8,754 \times 9 = 78,786$, append 2 zeros.	$8,754 \times 900 = 7,878,600$
e) $623 \times 6,000 = \underline{\hspace{2cm}}$	$623 \times 6 = 3,738$, append 3 zeros.	$623 \times 6,000 = 3,738,000$

Question	Rule Applied	Filled Equation
f) $9,917 \times 10 = \underline{\hspace{2cm}}$	Append 1 zero.	$9,917 \times 10 = 99,170$

Chapter Workout — Lattice & Word Problems (Page 58)

4. Solve the following using lattice method:

Question	Lattice Process	Final Answer
a) 76×15	Columns: 7, 6; Rows: 1, 5. Summing diagonals yields: 1,140.	1,140
b) 71×91	Columns: 7, 1; Rows: 9, 1. Summing diagonals yields: 6,461.	6,461
c) 19×98	Columns: 1, 9; Rows: 9, 8. Summing diagonals yields: 1,862.	1,862
d) 123×34	Columns: 1, 2, 3; Rows: 3, 4. Summing diagonals yields: 4,182.	4,182

5–10. Solve the following application word problems:

No.	Problem Details & Context	Step-by-Step Working	Final Solution
5	A tap fills a swimming pool in 1,980 minutes. How long for 45 pools?	- Time per pool = 1,980 minutes - Number of pools = 45 - Calculation: $1,980 \times 45$	89,100 minutes (or 1,485 hours)
6	How much petrol in 5,590 barrels, if each barrel can hold 159 litres?	- Capacity per barrel = 159 litres - Total barrels = 5,590 - Calculation: $5,590 \times 159$	888,810 litres
7	A healthy heart beats 72 times/min. Total beats from 12 noon to 12 midnight?	- Elapsed time = 12 hours - Total minutes = $12 \times 60 = 720$ mins - Calculation: 72×720	51,840 beats
8	A book has 1,098 pages. How many pages do 45 such books have?	- Pages per book = 1,098 - Total books = 45 - Calculation: $1,098 \times 45$	49,410 pages
9	A bag holds 181 bottles. Estimate the total bottles in 1,093 such bags.	- Rounding: 181 $\rightarrow$ 200 (nearest 100), 1,093 $\rightarrow$ 1,000 (nearest 1000) - Calculation: $200 \times 1,000$	~200,000 bottles (Actual: 197,833)
10	A watch costs Rs 9,375. Approximate the price of 39 such watches.	- Rounding: Rs 9,375 $\rightarrow$ Rs 9,000 (nearest 1000), 39 $\rightarrow$ 40 (nearest 10) - Calculation: $\text{Rs } 9,000 \times 40$	~Rs 360,000 (Actual: Rs 365,625)

Mental Maths, HOTS, & Life Skills (Pages 59 & 60)

Mental Maths (Page 59):

Shortcut Strategy: Multiply by a round number first, then subtract the difference. Example: $199 \times 9 = (200 - 1) \times 9 = 1,800 - 9 = 1,791$.

Question	Mental Shortcut Steps	Final Answer
a) 199×9	$(200 - 1) \times 9 = 1,800 - 9$	1,791
b) 899×7	$(900 - 1) \times 7 = 6,300 - 7$	6,293
c) $2,999 \times 4$	$(3,000 - 1) \times 4 = 12,000 - 4$	11,996
d) $3,999 \times 3$	$(4,000 - 1) \times 3 = 12,000 - 3$	11,997

HOTS — Higher Order Thinking Skills (Page 60):

Problem: There are 2,580 high-rise buildings in a city. Each building has 12 floors. There are 28 steps leading to each floor.

• **Question 1:** How many steps does a building have in all?

Step-by-step: Each building has 12 floors, with 28 steps per floor.

Calculation: $12 \times 28 = 336$ steps.

Answer: A building has **336 steps** in all.

• **Question 2:** How many floors will it make if we put together all the floors of the 2,580 buildings?

Step-by-step: 2,580 buildings, each with 12 floors.

Calculation: $2,580 \times 12 = 30,960$ floors.

Answer: It will make **30,960 floors** in total.

• **Enrichment (Total Steps in City):** if we calculate the total steps across all buildings, that would be $2,580 \times 336 = 866,880$ steps.

Life Skills and Values (Page 60):

Problem: There are 4,623 children in a school run by an orphanage. A company donated 25 notebooks to each child. How many notebooks did the company donate in all?

• **Step-by-step:** Number of children = 4,623. Notebooks per child = 25.

• **Calculation:** $4,623 \times 25$

- $4,623 \times 5 = 23,115$

- $4,623 \times 20 = 92,460$

- Total = $23,115 + 92,460 = 115,575$

• **Answer:** The company donated **115,575 notebooks** in all.

• **Value Reflection:** Donating old books, stationery, and clothes to children in orphanages is a noble and deeply compassionate act that supports educational access for all.
